StoreTender®

Freedom Standards CCTV

POS Fusion Intelligent Integration of POS with Video

- ◆ Loss Prevention Tools for the Grocery Industry
- ◆ Sophisticated Transaction Search & Retrieval
- ◆ Display Video from any Transaction Record
- ◆ Video Available from Back Office Module
- ◆ Launch WebCCTV Directly from POS

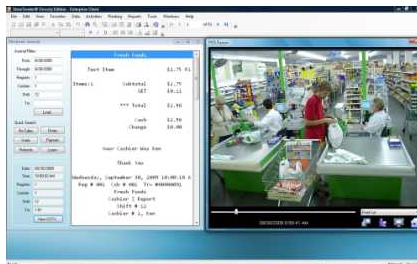

StoreTender POS

StoreTender is a full featured grocery package designed to handle the demanding requirements of today's supermarkets. Individual modules allow you to select the areas of operation you wish to control such as ordering, receiving, pricing, sales ads, shelf labels, loyalty programs, inventory control, cashier management, and of course, point of sale.

Now with the addition of Quadrox's *POS Fusion*, *StoreTender* can search for transaction records meeting the most demanding of requirements either directly from the StoreTender Administrator or Enterprise Server. Once identified WebCCTV will deliver and merge the previously recorded video that accompanied the transaction. Pre and post recording times are completely customizable by the user.

Merging POS Transaction Records

With Previously Recorded Video

WebCCTV Network Video Recorders

WebCCTV is a multi-functional network video recording solution supporting a wide variety of IP cameras as well as traditional analog security cameras. With sophisticated features such as masking and activity detection, multi-speed playback, complete remote browser-based accessibility, and a rich set of user management tools, *WebCCTV* makes the perfect video recording companion to POS solutions such as *StoreTender*.

When used in conjunction with *POS Fusion* previously recorded video can be delivered by *WebCCTV* over the network to the POS application at the touch of a button. Associating video with transaction history allows a user to significantly strengthen their loss prevention program to improve overall efficiencies and profitability. See what *WebCCTV* and *POS Fusion* can do for your business!
